at 8:15A.M. for registration and check-in.

Breakfast and lunch will be served.

*Optional: Participating teachers and  
educators will receive CEU credits  
through this program.*

## Program Overview

This EPN Field Trip, hosted at Granville High School, connects high school teachers and environmental professionals statewide. This program will take the form of an educational and networking event to introduce Ohio high school teachers to careers in environmental and agricultural science.

Three sites will be featured during this tour: Granville High School's sustainable garden, Denison University's solar array and pollinator site, and the Granville Land Lab, a collaborative outdoor educational facility for the Granville Exempted School District, Denison University, and surrounding school districts of Licking County.

The EPN is coordinating this event with the **Environmental Education Council of Ohio, Denison University, and the Granville Exempted Village School District**. The overarching goal of this program is to strengthen relationships and connections by linking pathways into environmental careers and providing relevant and accessible resources to educators and professionals.

**COST: \$20; Student registration is FREE**
